### ❖ Victims of Yarmouk Camp since ISIS Storming on April 1, 2015:

The AGPS documented (46) victims died during April since ISIS storming into the Yarmouk camp. As a result of dire conditions lived by residents of the camp, as well as the lack of nutrition and medical care, the elderly woman Fatheya Abu Jwaid, was born in 1935, and died on April 8, 2015.

In addition, Nasser Abass was shot by a sniper near Al Aroba Street when he was bringing water and food to his family, while on April 7, 2015, Zainab Daghestani (12 years) was shot for the same reason and in the same place.

On Monday 6, 2015, and as a result of being subjected to shelling with rockets and explosive barrels, the refugee, Hussein Taha, died in his house in the Yarmouk camp. On April 13, 2015, the body of Mohammed Sabbagh and his wife recovered from the rubble of their home, which locates behind Palestine hospital, following a bombing targeted the Yarmouk camp.

Many bodies were buried in public parks due to the inaccessibility to the cemetery as a result of the intensification of fighting in the early days of the invasion. Both media activists, Jamal Khalifa and Abdul Latif al-Rimawi, were buried in the garden of Abdel Kader Al-Husseini Mosque.

### ❖ Conclusion:

It is worth mentioning that the previous statistics were done by the documentation and statistics team of the Action Group for Palestinians of Syria, as the numbers are likely to increase because of the tense situation that preventing the documentation of all cases.

Many residents are reluctant to communicate with authorities about human rights for fear of harassment, as well as the difficulty of moving and communications also preventing, in many cases, without collecting adequate information about the victims.

In addition, a large number of missing people who were lost during the disaster of sinking "boats of death" in the Mediterranean early on October 2013, where hundreds of remains Palestinian Syrian refugees who were on board are missing.

13

On the other hand, it should be noted that most reasons that led to death of (2910) Palestinian victims are still exist, since many Palestinian refugee camps are still exposed to Shelling between now and then in addition to the continued siege imposed on the Yarmouk camp.

The AGPS confirms that this report concerns about documenting the statistics of Palestinian refugee victims in Syria since the beginning of events till the end of June 2015, with no concern about identifying the actual doer.
